

The new era of work culture began after 100 years. That's really long. Let's see how people managed to change their attitude towards this new work culture. We are talking about 'Singapore' the country where east meets west. If we see the demography, middle-aged has the highest population, don't we think it's one of the best country to survey for a "WORK FROM HOME" culture. Let's dig more and see what we have find out!!!!...

SINGAPORE

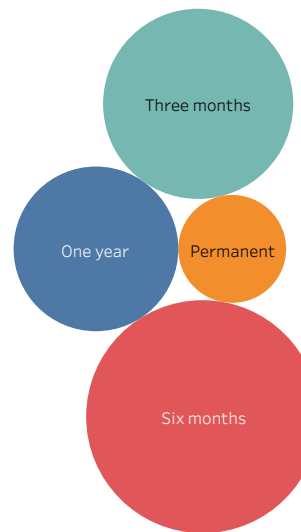

Not feeling safe to return

Age group of WFH

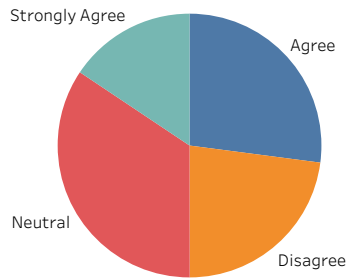

Look's great to see older age group are also catching up fast and preferring work from home

social_distancing

Social distancing norm may go upto a year

Children are getting more importance as more female workers stays home

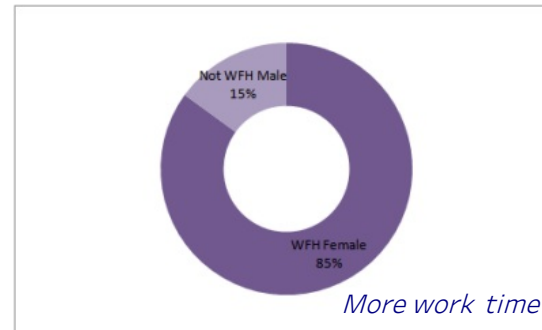

Stress and Working time

Seem's like they are health conscious and also have a thought of their own family

Household chores + Children..

More work time prones to stress and can effect mental health, as of now employe can't go out as before.
